COURSE AUTHOR · CURRICULUM DEVELOPER · CORPORATE TRAINER

Build skills your team can put to work

Billy “Mr. Aloha” Wigley

AI & Excel Productivity Expert | Microsoft Certified Trainer

Billy develops and delivers hands-on AI and Excel training, from prompting in ChatGPT or Copilot to directing AI agents and checking their work.

DELIVERY **Live Online (VILT) · On-Site Corporate Workshops · Customized Team Programs**

WHAT BILLY CAN BUILD FOR YOU

01 **A course or a full learning program**

Turn a business need into a clear learning path, from short lessons on one skill to a program that builds skills in stages.

02 **Exercises that feel like the job**

Give learners realistic projects: brief an AI assistant to research prospects and verify the shortlist, or automate a recurring Excel report and check the totals.

03 **Assessments that show what learners can do**

Use quizzes, scenario-based role plays and applied assignments to check whether learners can use the skill on their own.

SELECTED WORK

AI for Leaders · Udemy	AI readiness, responsible adoption and role-play practice.
Excel Formulas · LearnFormula	A beginner’s guide to structured references in Excel.
Excel Macros Micro · Get Skills	Macro recording, quizzes and a hands-on worksheet project.
Advanced Excel Skills · Madecraft	Created for Madecraft: array formulas and functions for data analysis.
